## Helpful Hints

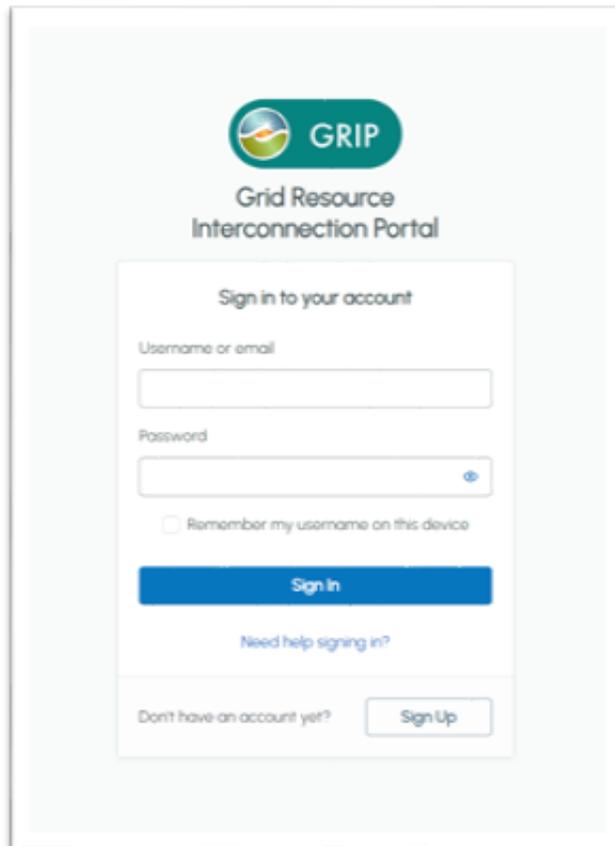

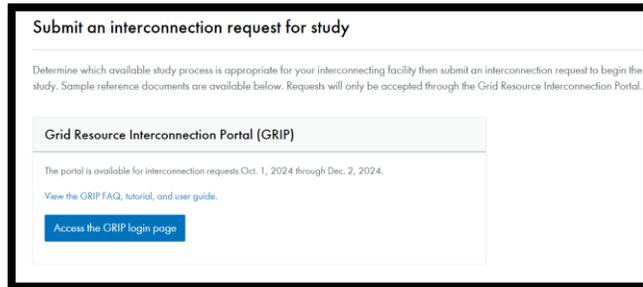

Section	Notes
General	File upload error: delete and re-upload, wait until other files finish and try again
	Email notifications will be sent to the Project manager and Additional Contact. Consultants enter your information here or you will not receive notifications.
	When moving back to correct a section, user must save and continue on each page until the end
	If required field is not applicable to your project enter 0 or NA.
Unit Ratings	Hybrid resources may show calculation errors here. Verify values and bypass errors.
Induction Generator info	Enter number of inverters for section to populate
Repowers	Enter in the comments field that the project is a repower and enter 0 in the scoring fields
Merchant Deposit	EO is showing a required merchant deposit, bypass this until it is resolved
Site Control Deposit	The deposit amount will be set to zero if the payment information activity has been completed and the user goes back to the documentation and legal information activity and changes the Is Site Control Unobtainable Due to Regulatory Limitations? field to yes. Upload documents supporting the correct deposit.

 <b>California ISO</b>	<b>Technology</b>	<b>ISO Version:</b>	1.0
<b>Grid Resource Interconnection Portal (GRIP) User Guide</b>		<b>Effective Date:</b>	11/12/2024

## User Registration / Sign in

### Sign in / User Registration Page

1. New users navigating to the portal's publicly accessible webpage register a user account by clicking Sign Up.
2. Existing users sign in using username or email and password.

 <b>California ISO</b>	<b>Technology</b>	<b>ISO Version:</b>	1.0
<b>Grid Resource Interconnection Portal (GRIP) User Guide</b>		<b>Effective Date:</b>	11/12/2024

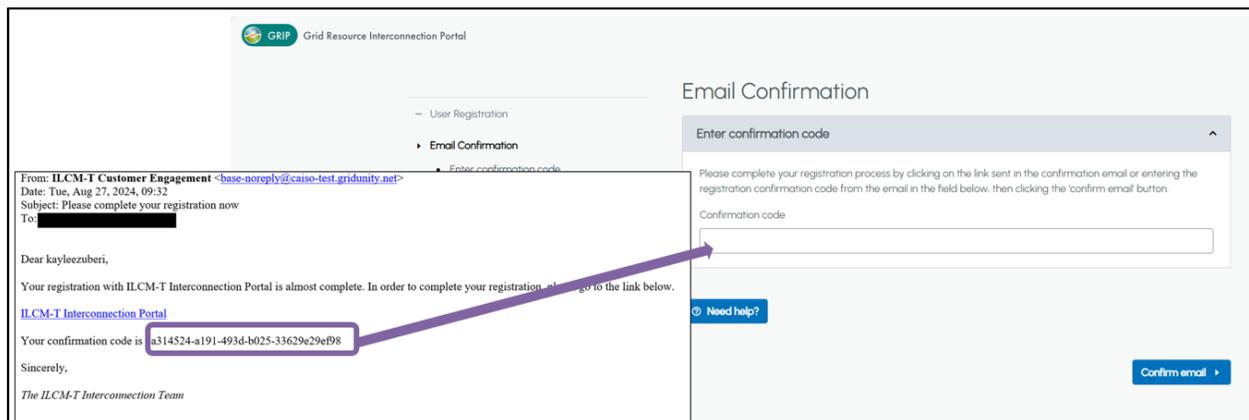

## User Registration/ Sign in | Sign Up

To register as a new user, click “Sign Up” button, then follow User Registration flow by entering:

- Username (cannot be an email address)
- Email address
- Password
- Clicking Captcha
- Click “Register”

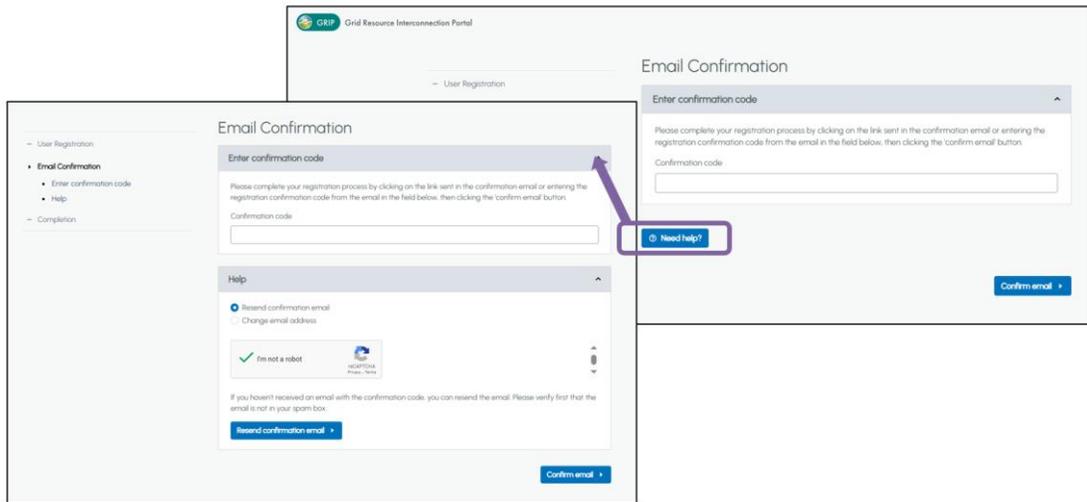

Copy confirmation code from email to confirm registration:

 <b>California ISO</b>	<b>Technology</b>	<b>ISO Version:</b>	1.0
<b>Grid Resource Interconnection Portal (GRIP) User Guide</b>		<b>Effective Date:</b>	11/12/2024

## User Registration / Resend Confirmation Code

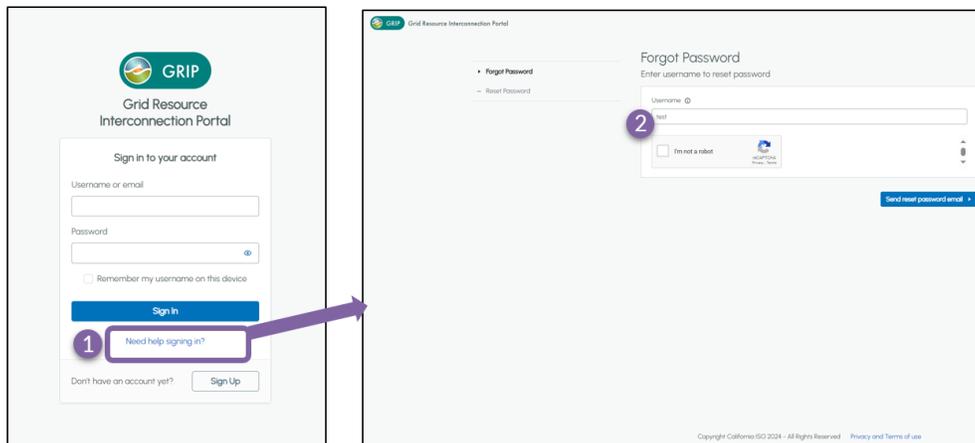

If you need for your email confirmation to be resent, click on the 'Need help?' button on the **Email Confirmation** screen. This will expand the **Help** option you to indicate if you want to 1) Resend Confirmation email or 2) Change email address. Once you've made your selection, click on the 'Resend confirmation email'.

## User Registration / Sign in | Forgot Password

For sign in support:

1. Click "Need help signing in?"
2. Follow the Forgot Password flow.

 <b>California ISO</b>	<b>Technology</b>	<b>ISO Version:</b>	1.0
<b>Grid Resource Interconnection Portal (GRIP) User Guide</b>		<b>Effective Date:</b>	11/12/2024

## Home Screen

### 1. Global Navigation Menu

Present on all pages. Provides user ability to navigate throughout system.

### 2. Outstanding Actions

User-configurable summary of projects requiring important actions. Includes links to filtered list of relevant projects for easy access.

### 3. What's New

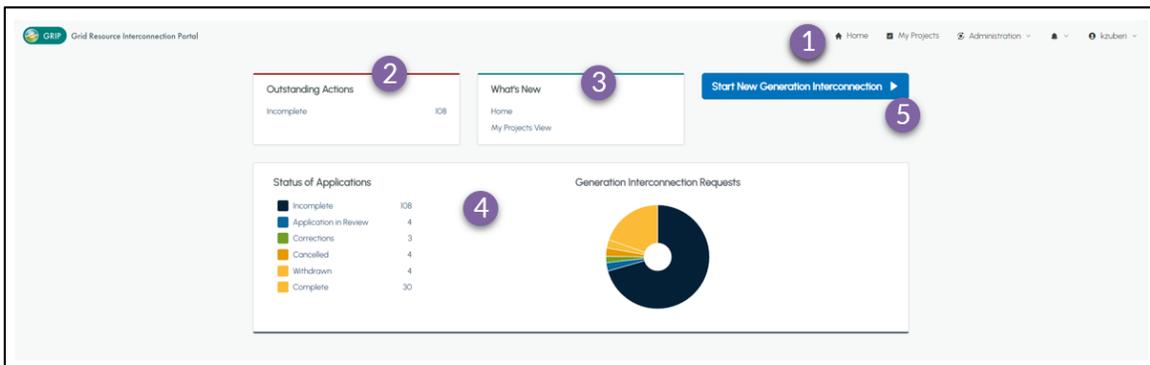

Quick access to new or important system or business process information.

### 4. Status of Applications Dashboard

Configurable view of applications summarized by status category including links to My Projects page view filtered by that status.

### 5. Start New Application

Button used to start new generation interconnection applications.

## Home Screen | Global Navigation Menu

### 1. Home

Returns user to home/dashboard screen.

### 2. My Projects

Summary grid view of all projects the user has access to.

### 3. Administration

Only accessible to administrative user roles. Provides access to user management, company management and other administrative functions.

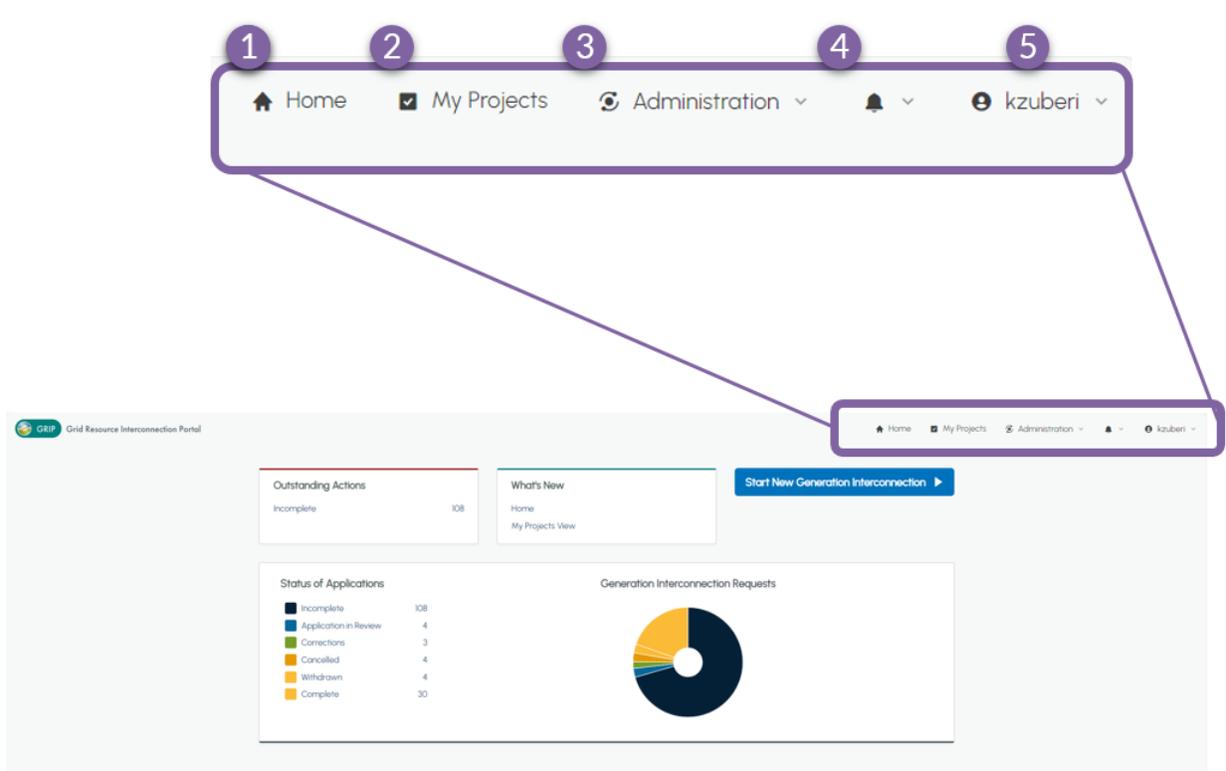

### 4. Notifications

Provides system notifications.

### 5. Account

Provides access to account details, address book, and sign out function. Also provides user options to Join or Register a company.

 <b>California ISO</b>	<b>Technology</b>	<b>ISO Version:</b>	1.0
<b>Grid Resource Interconnection Portal (GRIP) User Guide</b>		<b>Effective Date:</b>	11/12/2024

## Account Details

The Account Details screen provides the user with options to:

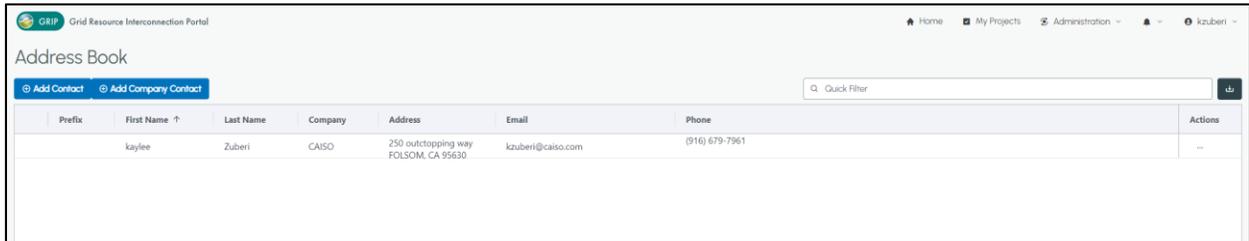

- Change email address
- Change password

 <b>California ISO</b>	<b>Technology</b>	<b>ISO Version:</b>	1.0
<b>Grid Resource Interconnection Portal (GRIP) User Guide</b>		<b>Effective Date:</b>	11/12/2024

## Account Details | Address Book

The Address Book provides a view of user’s contact information as provided when the user registered. This information is also used when using the “Copy From” feature in the Contact Information section of the application submission process.

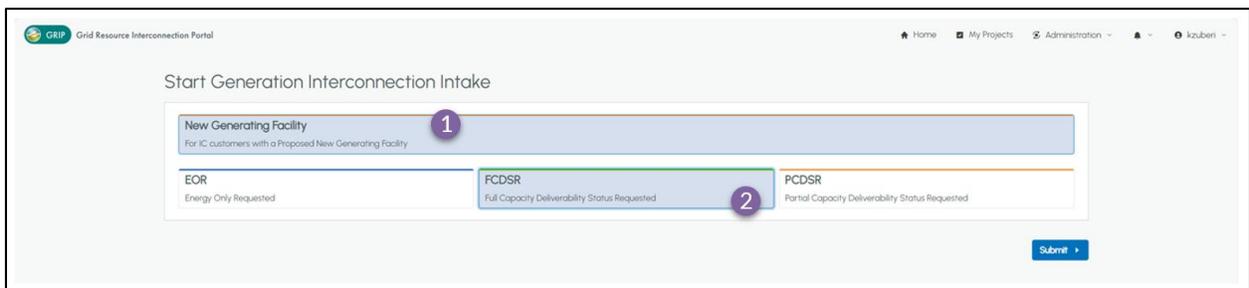

## Application Submission

### Application Submission | Program Selection

Program Selection is the first activity within the application submission process. Two categories define the Interconnection Request:

1. Program type of the interconnection request
2. The Service Type for the request

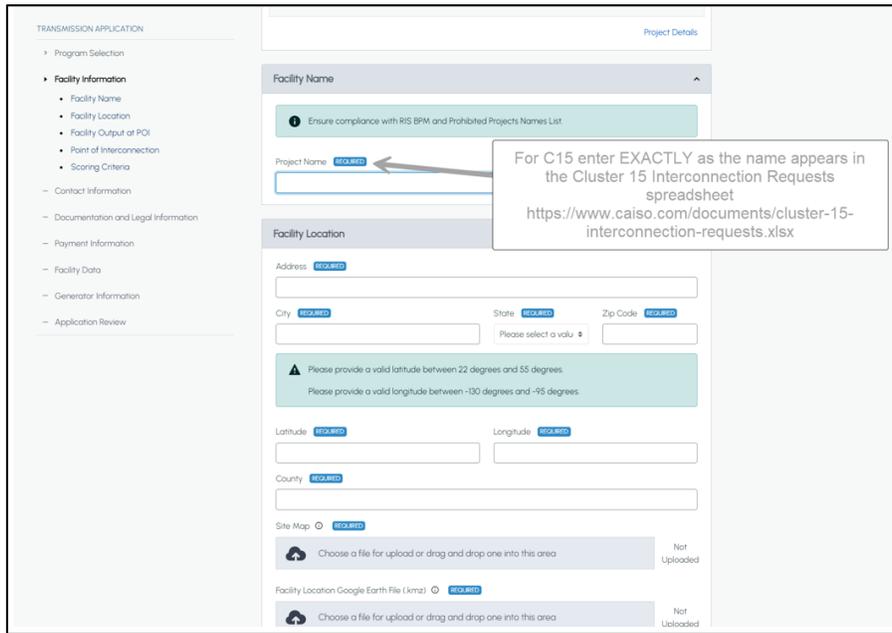

### Application Submission | Facility Information

Facility Information activity captures pertinent information of the facility:

- Project Name
- Facility Location

 <b>California ISO</b>	<b>Technology</b>	<b>ISO Version:</b>	<b>1.0</b>
<b>Grid Resource Interconnection Portal (GRIP) User Guide</b>		<b>Effective Date:</b>	<b>11/12/2024</b>

TRANSMISSION APPLICATION

Project Details

Facility Name

Ensure compliance with RIS BPM and Prohibited Projects Names List

Project Name **REQUIRED**

Facility Location

Address **REQUIRED**

City **REQUIRED** State **REQUIRED** Zip Code **REQUIRED**

Please provide a valid latitude between 22 degrees and 55 degrees.  
Please provide a valid longitude between -130 degrees and -95 degrees.

Latitude **REQUIRED** Longitude **REQUIRED**

County **REQUIRED**

Site Map **REQUIRED**

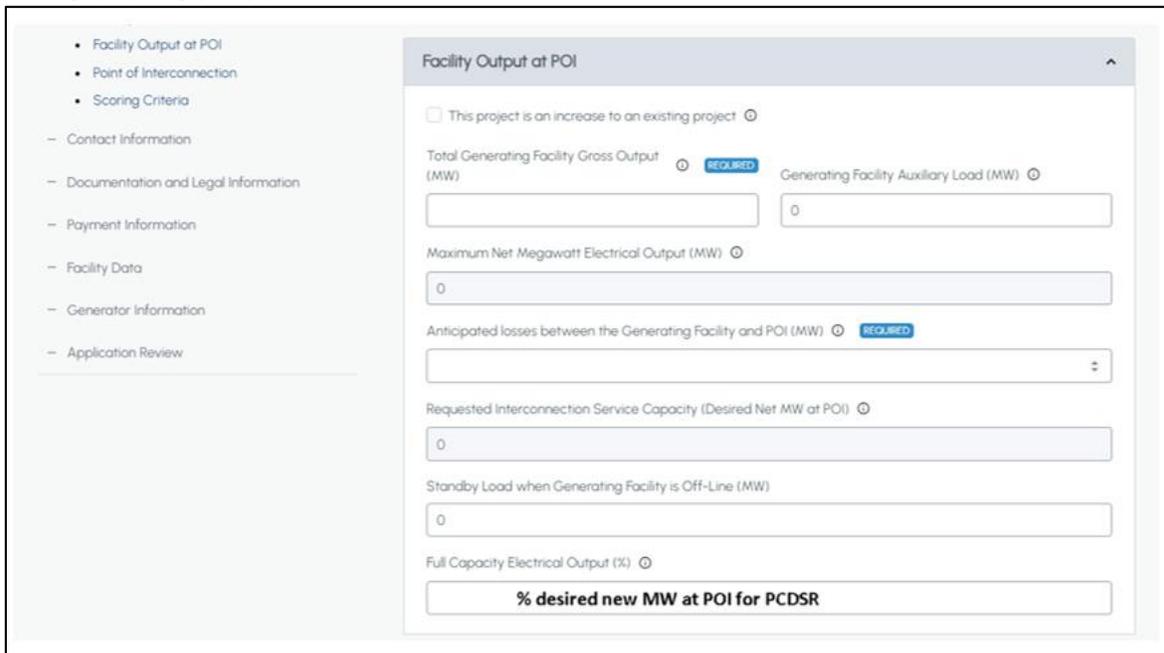

Choose a file for upload or drag and drop one into this area Not Uploaded

Facility Location Google Earth File (kml) **REQUIRED**

Choose a file for upload or drag and drop one into this area Not Uploaded

Facility Information activity captures pertinent information of the facility:

- Installed Generating Facility Capacity
- Net Output as measured at POI
- Station Service

Facility Output at POI

This project is an increase to an existing project

Total Generating Facility Gross Output (MW) **REQUIRED** Generating Facility Auxiliary Load (MW)

Maximum Net Megawatt Electrical Output (MW)

Anticipated losses between the Generating Facility and POI (MW) **REQUIRED**

Requested Interconnection Service Capacity (Desired Net MW at POI)

Standby Load when Generating Facility is Off-Line (MW)

Full Capacity Electrical Output (%)

**% desired new MW at POI for PCDSR**

 <b>California ISO</b>	<b>Technology</b>	<b>ISO Version:</b>	1.0
<b>Grid Resource Interconnection Portal (GRIP) User Guide</b>		<b>Effective Date:</b>	11/12/2024

## Application Submission | POI

ISO controlled substations and lines will be listed in the substation drop down. If the desired POI is not listed, check the substation not listed box.

Enter:

1. The desired substation or line
2. Voltage
3. Choose the project deliverability or reimbursement option.

**Point of Interconnection** ^

Transmission Owner REQUIRED

PG&E v

Substation(s) Not Listed

Substation REQUIRED

ALHAMBRA 115 kV v

Voltage REQUIRED

115 v

**Zone Deliverability Option / Cash Reimbursement Option**

Deliverable

**Project Deliverability / Cash Reimbursement Option**

**Deliverable** v

Study Area

PG&E CBA

Is the project sharing a gen-tie with other projects? REQUIRED

Yes

No

Is the project interconnection to an existing transmission line? REQUIRED

Yes

No

## Application Submission | Scoring Criteria

For information on scoring criteria see Tariff Appendix KK Section 4.

 <b>California ISO</b>	<b>Technology</b>	<b>ISO Version:</b>	1.0
<b>Grid Resource Interconnection Portal (GRIP) User Guide</b>		<b>Effective Date:</b>	11/12/2024

**Scoring Criteria**

Engineering Design Plan Completeness Sub-Point **REQUIRED**

Engineering Design Plan Supporting Documentation  
 Not Uploaded

Expansion of Existing Facility  
 Yes  No

Expansion Supporting Documentation **REQUIRED**  
 Not Uploaded

Expansion Type **REQUIRED**  
 Expansion of a generation facility that is currently under construction  
 Expansion of an operating facility  
 Expansion of a facility that is under construction or in operation, where the Gen-Tie already has sufficient surplus capability to accommodate the additional resource

Ability to provide Local Resource Adequacy (RA) in an LCRA with an ISO demonstrated need for additional capacity in that local area **REQUIRED**

Long Lead Time Resources  **REQUIRED**

## Application Submission | Contact Information

For contacts outside of the US, select other country. The zip code field is then no longer required.

**Project Manager Contact**

Select from Address Book  
kaylee Zuberi CAISO

**Additional Representative Contact**

Select from Address Book  
kaylee Zuberi CAISO

First Name **REQUIRED**  Last Name **REQUIRED**

Title **REQUIRED**  Company **REQUIRED**

Address **REQUIRED**

City **REQUIRED**  State **REQUIRED**  Zip Code **REQUIRED**

Phone **REQUIRED**  Email **REQUIRED**

**Digital Signature**

## Application Submission | Generator Information

Section A captures information related to the Generators, Transformers, Tie Line and Impedance data, as well as One-Line and Model documentation.

- Unit Ratings (Generator Type)
  - Allows for 1 or more Generators
- Short Circuit Information
- Main Generator Set-Up Transformer
  - Allows for 1 or more GSU
- Pad Mount Transformer
  - Allows for 1 or more Transformers
- Tie-Line Information
  - Allows for 1 or more Tie-Lines
- System Equivalence Impedance Data for Wind/Photovoltaic plants
  - Allows for 1 or more Impedance Data
- Dynamic Modeling Information
- One-Line & Model Information

## Completeness Review

### Completeness Review | Corrections

Applications that do not pass completeness review are sent back to the interconnection applicant for corrections. This process is initiated by the system sending an email notification of the review results and required action.

**From:** ILCM-T Customer Engagement <base-noreply@caiso-test.gridunity.net>  
**Sent:** Thursday, November 7, 2024 6:13 PM  
**To:** kayleezuberi@gmail.com; Zuberi, Kaylee <kzuberi@caiso.com>  
**Subject:** [EXTERNAL] Cluster 15 (test 711) IR Package Corrections Required

Kaylee,

The subject IR submission has been reviewed and found to be incomplete please return to the Project Details page to correct your application.

Questions may be submitted through the comments section of GRIP.

Regards,

The Interconnection Resources Team

<b>Grid Resource Interconnection Portal (GRIP) User Guide</b>		<b>Effective Date:</b>	11/12/2024

After clicking project ID on My Projects page, the Application Details page will allow the user to re-enter and edit the application to correct the flagged deficiencies.

Navigate through each page to find deficiencies. The system alerts users at the top of the page with errors. The fields requiring corrections display flag indicators as well as the reviewer's comments.

Fields that have been corrected will display an updated flag icon and the prior value as well as reviewer comment remain accessible to the applicant for reference.

## My Projects

The My Projects page provides a summary view to all users for the projects they have access to.

My Projects functionality includes:

1. View customization via column selection, column order, sort, search, and preset filter functions
2. Access to individual Project Details via the ID hyperlink
3. Project data export (Excel or CSV file)
4. Accessing project-specific user actions

The screenshot shows the 'My Projects' page in the GRIP portal. The page header includes the GRIP logo and navigation links for Home and My Projects. A search bar and a 'Quick Filter' input are visible. The main content is a table with the following columns: ID, Project, Gen Number, Request Type, Service Type, Status, New NRIS, New ERIIS, Facility Address, and Actions. The table contains 14 rows of project data. Annotations 1, 2, and 3 are placed on the page to highlight specific features: 1 points to the top navigation and search area, 2 points to the ID column, and 3 points to the export button.

ID	Project	Gen Number	Request Type	Service Type	Status	New NRIS	New ERIIS	Facility Address	Actions

## My Projects | Data Export

Export data from the My Projects page by:

1. Clicking the export button,
2. Selecting the export file type,
3. Clicking “Export”.

 <b>California ISO</b>	<b>Technology</b>	<b>ISO Version:</b>	1.0

## My Projects | View Customization

View customization options on My Projects can be performed by:

1. Changing column order
2. Changing column selection
3. Page search
4. Filtering on column values

The image displays three sequential screenshots of the 'My Projects' web application interface, illustrating different customization options. Each screenshot is annotated with a numbered callout (1-4) and a purple box highlighting the specific feature.

**Screenshot 1:** Shows the 'My Projects' header with a 'PRESETS' dropdown set to 'No preset selected'. A purple box labeled '1' highlights the 'Application Type' column header, with arrows indicating it can be dragged to reorder columns.

**Screenshot 2:** Shows the same interface with a purple box labeled '2' highlighting the 'Application Type' column header. A dropdown menu is open, showing a list of columns with checkboxes for selection. The selected items are ID, Project, Study Cycle, Application Type, Status, and Responsible Party.

**Screenshot 3:** Shows the same interface with a purple box labeled '3' highlighting the 'Quick Filter' search box in the top right corner.

**Screenshot 4:** Shows the same interface with a purple box labeled '4' highlighting the 'Status' column header. A dropdown menu is open, showing a list of status values with checkboxes for selection. The selected items are (Select All), Application in Review, Cancelled, Complete, Corrections, and Corrections Review.

## My Projects | Saving Preset Filters

Once view customization has been configured, those settings can be saved as a Preset View Filter for easy, repeatable access.

To save a preset filter:

1. Filter/customize the page view as desired
2. Click the “+” to Create Preset
3. Name the preset and click the “✓” to save
4. Note: Preset filters can be saved to the My Projects page (config.ic-applications-presets) and/or to the home (dashboard) page (config.dashboard-outstanding-actions)
5. Presets can also be saved privately (only visible to acting user) or publicly (visible to all users)

## My Projects | User Actions

User Actions are manually initiated tasks a user can execute on an application. User actions are available via the Actions column on a per project basis on the My Projects page. The project cloning feature is accessed here.

Note: User Actions are also accessible on the Project Details page (Actions tab).

The screenshot shows the 'My Projects' page in the GRIP system. It features a table with columns for ID, Project, Status, Facility Address, Customer Name, Customer Phone, Customer Email, Deadline Due Date, Cycle, Review Specialist, Days Remaining, and Actions. The 'Actions' column for the first few rows is circled in red, highlighting the options: 'Export Application Data', 'Clone Application', and 'Cancel Application'.

## My Projects | User Actions – Duplicate application

When duplicating an application, the documents will not transfer. This is so ensure each project retains its own documentation. The program selection and facility information sections will need to be completed for the new project. This may also be completed from the project details actions tab.

To duplicate an application:

1. Find the application to clone, select the three dots in the actions tab.
2. Select clone application.
3. Verify the information is correct, submit.
4. Go to new application.
5. Fill in the program selection and project specific information for the new project.
