

MARKET NOTICE

January 12, 2004

Preparatory Rerun Update

ISO Market Participants:

This notice contains the following information:

- CD's for Trade dates December 1- 5, 2000 will be sent out today January 12, 2004.
- Notification of an error on the 11/5/00 - 11/20/00 Statements
- Notice of Modification of the CD containing the details to validate the Statements

Notice of an error on the 11/5/00 - 11/20/00 Statements

An error was encountered for the following trade dates, in which manual adjustments were not reversed out. The affected trade dates are,

Nov 5, 2000 data that appeared on the Nov 6, 2003 Preliminary Statement

Nov 11 - 15, 2000 data that appeared on the Nov 10, 2003 Preliminary Statement

Nov 16, 2000 - Nov 20, 2000 that appeared on the Nov 11, 2003 Preliminary Statement

The charge types impacted are **CT 401, CT 1010, CT 1210, CT451 and CT 452.**

The ISO will be correcting the error today Jan 12, 2004 and the corrections will appear on the **Nov 12, 2003 Preliminary Statement.** Affected SC's will see a reversal of manual adjustments for these trade dates.

Notice of Modification of the CD containing the details to validate the Statements

The ISO modified the format of the CD containing the details to validate the rerun statements beginning December 1, 2000. The manual adjustments represented by "A" records in the CD summary file will no longer appear on the CD.

This change is being introduced because the manual adjustments created confusion among Market Participants. **SC's only need the details records (represented by "D") to validate the rerun adjustments that appear on the Preliminary Statements.** Old manual adjustments appearing on the CD are not required to validate the new adjustments.

Please note: This change is only for the CD's that are being provided for the Rerun. There is no change in the format of the summary files that SC's download from the SC workspace.
