

**2013-2014 Transmission Planning Process  
Project Sponsor Competitive Solicitation**

**Validated Project Sponsor Application List**

As part of the 2013-2014 transmission planning process, the ISO identified a reliability-driven need for a 375 MVAR reactive power support element connecting to the Miguel 500 kV bus. This resulted in a competitive solicitation process for a project sponsor selection. The bid window for interested project sponsors to submit applications to finance, own, construct, operate and maintain the approved reliability-driven Miguel 500 kV 375 MVAR reactive power support element opened on April 16, 2014 and closed on June 16, 2014.

Pursuant to Section 24.5.2.2 of the ISO Tariff, the ISO has validated one project sponsor application which contained sufficient information to be further considered in the selection process to finance, own, construct, operate and maintain the Miguel 500 kV 375 MVAR reactive support element. The project sponsor is listed below:

- San Diego Gas and Electric Company

The description and functional specifications for the reliability driven Miguel 500 kV 375 MVAR reactive power support element can be found on the ISO website at:
