Re: California Independent System Operator Corporation

**Informational Filing of the Two-Year Suspension of the SPTO
Tariff Amendment**

Docket No. ER25-2442-___

Dear Secretary Reese:

On June 6, 2025, the California Independent System Operator Corporation (CAISO) proposed a tariff amendment to enhance the Subscriber Participating Transmission Owner (Subscriber PTO) model. Among other enhancements, the revisions suspended for two years the collection and payment of amounts that result from non-subscribers' scheduling of import transactions on Subscriber PTO transmission facilities. By order issued August 5, 2025, the Commission accepted these tariff revisions and directed the CAISO to submit a filing to inform the Commission of the commencement of the two-year suspension period and the date on which the two-year suspension will end.¹

The two-year suspension period begins on the commercial operation date of the last generating unit interconnected to a Subscriber PTO's transmission facilities on which that last generating unit is entitled to schedule using subscriber rights, and includes the period from the date on which the CAISO accepts operational control of the Subscriber PTO's transmission facilities (*i.e.*, the first date on which a nonsubscriber schedule could be accepted at the Scheduling

¹ *Cal. Indep. Sys. Operator Corp.*, 192 FERC ¶ 61,121 (2025). The Commission directed the CAISO to notify the Commission of the actual effective date of the Tariff revisions within five business days of their implementation, in an eTariff submittal using Type of Filing Code 150 – Report.

PTO's scheduling point).² The commercial operation date of the last generating unit interconnected to the SunZia Transmission, LLC (SunZia) project, the first Subscriber PTO, occurred on May 19, 2026. Accordingly, the commencement date for the suspension period is May 20, 2026 (12:00 am) and the end date for the suspension period will be May 19, 2028 (11:59 pm). This means that May 20, 2028 is the first day that non-subscriber usage of Subscriber PTO facilities will be charged the applicable non-subscriber usage rate.³ The suspension period also includes the period from the transfer of operational control of the SunZia project, which occurred on April 13, 2026, until the start of the two-year suspension period.⁴

The CAISO has served copies of this filing on all the parties to the service list for this proceeding. In addition, the CAISO is posting this filing on the CAISO website.

If there are any questions concerning this filing, please contact the undersigned.

Respectfully submitted,

By: /s/ John Anders
