Preparatory Rerun Update - Charge Type 1010, 1030, 1210

An error was discovered with the manual tools used for settlement of CT 1010, CT 1210 and CT 1030 as the result of a dispute. The tool was using Scheduled Exports as opposed to Real Time Exports to calculate the metered demand for CT 1010 , CT 1210 and CT 1030. The impacted trade dates are Oct 2, 2000 - Nov 16, 2000. Corrections will appear on Preliminary Statements for Trade Dates 4/1/04, 4/2/04 and 4/5/04.

In addition, the ISO continues to work to resolve internal system issues and will provide further notice when the rerun will resume.
