Updates

The July EDAM Report meeting will be held on August 24, 2026 at 1 pm.

Bi-Weekly Market Performance Report

The CAISO posted the bi-weekly market performance report for July 29-August 11, 2026. The maximum day-ahead DLAP price was \$118.58/MWh for the two weeks and the maximum day-ahead ELAP was \$102.15. The reasons for CAISO price excursions in the fifteen-minute and five-minute markets are documented in the report.

Price Correction Review

The CAISO has been correcting invalid congestion on IPPUTAH_ITC in RTD due to a software defect. For IFM July 29, 2026, there were price corrections on invalid binding constraints due to missing virtual bids. For IFM for Aug 4 and Aug 5, there were RUC price corrections due to a software defect that impacted resource schedules in RUC.

Price Correction Messages are posted on OASIS under Atlas Reference → Messages → Price Correction Messages.

General Questions

None

¹ The California ISO (CAISO) hosts this bi-weekly market update conference call, generally at 10:15AMPST bi-monthly on Thursdays. This call is an opportunity for market participants to ask general questions regarding the market. Please send any questions to [CIDI system](#), which includes questions that have proprietary information and that might be commercially sensitive.
