Bi-Weekly Market Performance Report

The CAISO posted the bi-weekly market performance report for March 26-April 08, 2025. The day-ahead market was generally quiet. The maximum day-ahead cleared demand was 27,320 MW and the maximum day-ahead DLAP price was \$64.53/MWh for the two weeks. The reasons for the price excursions in the fifteen-minute and five-minute markets are documented.

Price Correction Review

There were system-wide price corrections for trade date 4/1/25 in the RTD market from 7:00 to 7:20 due to an issue where the CAISO's load forecasting system was not receiving proper updates on load actual values. Other price corrections were minor and impacted only a limited number of entities. Price Correction Messages are posted on OASIS under Atlas Reference → Messages → Price Correction Messages.

General Questions

None

¹ The California ISO (CAISO) hosts this bi-weekly market update conference call, generally at 10:15AM PST bi-monthly on Thursdays. This call is an opportunity for market participants to ask general questions regarding the market. Please send any questions to [CIDI system](#), which includes questions that have proprietary information and that might be commercially sensitive.
