Updates

The issue of high congestion on ML_RM12_NS and 6110_COI_N-S real-time market and unscheduled flows impacting the WECC will be discussed in the September 27 Market Planning and Performance Forum.

Bi-Weekly Market Performance Report

The ISO posted the bi-weekly market performance report for July 20 through August 2, 2022. During this period, markets were generally quiet. The maximum day-ahead cleared demand was 45,020 MW for the two weeks. The Maximum day-ahead DLAP price was \$206.10/MWh. The reasons for the price excursions in the fifteen-minute and five-minute markets are documented.

Review of the Price Correction Report

During the week of Week of Jul 18-22, 2022, the ISO processed 506 intervals for price correction due to data input errors or software defects. During the week of Week of Jul 25-29, 2022, the ISO processed 939 intervals for price correction due to data input errors or software defects.

General Questions

None

¹ The California ISO (CAISO) hosts this bi-weekly market update conference call, generally at 10:15AM PST bi-monthly on Thursdays. This call is an opportunity for market participants to ask general questions regarding the market. Please send any questions to [CIDI system](#), which includes questions that have proprietary information and that might be commercially sensitive.
