Bi-Weekly Market Performance Report

The ISO has published the bi-weekly market performance report for November 11, 2020 – November 24, 2020. The maximum hourly IFM DLAP price for this period was \$126/MWh. For the two-week period, the maximum day-ahead total cleared demand was 29,270 MW. For the real-time market, we observed very flow price excursions; the root cause for price excursions is provided on the first page of the report.

Review of the Price Correction Report

During the week of November 09– November 13, the ISO processed 234 intervals for price correction due to a software defect and data input errors. During the week of November 16– November 20, the ISO processed 48 intervals for price correction due to a software defect and data input errors. During the week of November 23– November 27, the ISO processed zero intervals for price corrections.

¹ The California ISO (CAISO) hosts this bi-weekly market update conference call, generally at 10:15AM PST bi-monthly on Thursdays. This call is an opportunity for market participants to ask general questions regarding the market. Please send any questions to [CIDI system](#), which includes questions that have proprietary information and that might be commercially sensitive.
