

Market Update Call Meeting Minutes

July 30, 2020¹

Agenda

- 1) Updates and Meeting Minutes Review – Rahul Kalaskar
- 2) Weekly Performance Report – Rahul Kalaskar
- 3) Price Correction Reports – Rahul Kalaskar
- 4) General Questions/ Comments– Rahul Kalaskar

Update:

Weekly Market Performance Report

The ISO has published the bi-weekly market performance report for July 08, 2020 – July 21, 2020. The maximum hourly IFM DLAP price for this period was \$153.54/MWh. Between July 9 to July 17, the day-ahead total cleared demand was above 40,000 MW. The Real-Time market also observed some high price on July 10, 11 and 13. These high prices were attributed to congestion and high demand in Southern California.

Review of the Price Correction Report

No New Reports were published since the last call.

General Reminders

- **NOTE:** The current best practice, and preferred method, of asking questions is to route through the **Customer Inquiry, Dispute and Information** system, “CIDI”.
- Please submit your questions ahead of the call; there are occasions when we have to gather information: submission ahead of time allows us more preparation time to reply.
- To add general comments/questions/requests to the **action item list or meeting agenda**, market participants should also open corresponding CIDI tickets with both the Functional Environment as “Market Performance” and SCID as “XPUB” by close of business (COB) on Mondays.

¹ The California ISO (CAISO) hosts this bi-weekly market update conference call, generally at 10:15AM PST bi-monthly on Thursdays. This call is an opportunity for market participants to ask general questions regarding the market. Please send any questions to [CIDI system](#), which includes questions that have proprietary information and that might be commercially sensitive.
