NOTICE OF TECHNICAL CONFERENCE

(August 22, 2003)

The staff of the Federal Energy Regulatory Commission is convening a technical conference regarding Reliability Must-Run (RMR) Condition 2 generating units and the California Independent System Operator's (CAISO) ability to issue dispatch notices to these units for system reliability, rather than solely for local reliability, within the CAISO control area. The conference will be held on Wednesday, September 3, 2003, at the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC beginning at 9:30 a.m.

In preparation for this technical conference, parties should be ready to discuss their views on what amount an owner of an RMR Condition 2 generating unit should be paid if its RMR Condition 2 unit is dispatched for system reliability in the CAISO control area and how the costs of such a dispatch would be allocated. For additional information concerning the conference, interested persons may contact Robert Pease at "Robert.Pease@ferc.gov" or Colin Mount at "Colin.Mount@ferc.gov." No telephone communication bridge will be provided at this technical conference.

Magalie R. Salas
