I. Background

A Market Disruption is an action or event that causes a failure of a CAISO Market, related to system operation issues or System Emergencies.¹ Pursuant to Section 7.7.6 of the CAISO Tariff, the California Independent System Operator Corporation (CAISO) can take one or more of several specified actions if a Market Disruption occurs, to prevent a Market Disruption, or to minimize the extent of a Market Disruption. The CAISO reports Market Disruption occurrence in any of the following circumstances:

- When any of the CAISO market processes fail to publish, including the Integrated Forward Market (IFM), Residual Unit Commitment (RUC), the Real-Time Market, which includes the Hour-Ahead Scheduling Process (HASP), Fifteen Minute Market (FMM), and the Real-Time Dispatch (RTD) processes;
- When the CAISO manually overrides the closing of the Day-Ahead Market; or
- Any time that the CAISO removes Bids from a CAISO Market to prevent a Market Disruption or to minimize the extent of a Market Disruption.

The Market Disruption report contains the following information:

- The frequency and types of actions taken by the CAISO pursuant to Section 7.7.6;
- The nature of the Market Disruptions that caused the CAISO to take action, or the Market Disruptions that were successfully prevented or minimized by the CAISO as a result of taking action, and the CAISO's rationale for taking such actions pursuant to Section 7.7.6;
- Information about the Bids (including Self-Schedules) removed pursuant to Section 7.7.6 (*i.e.*, megawatt quantity, point of interconnection, specification of the Day-Ahead versus Real-Time Bid, and Energy or Ancillary Services Bid); and
- The CAISO's rationale for its removal of Bids (including Self-Schedules) pursuant to Section 7.7.6.²

¹ Section 7.6 and 7.7 of the CAISO Tariff refer to these system operation issues or System Emergencies, respectively. CAISO Tariff, Appendix A, definition of Market Disruption. Capitalized terms not otherwise defined herein have the meanings set forth in the CAISO Tariff.

II. Report on Market Disruptions Occurring from September 16, 2019 through October 15, 2019

The CAISO’s report on Market Disruptions that occurred from September 16, 2019 through October 15, 2019, is provided in Table 1 and Attachment A below. Attachment A includes an entry for each reportable Market Disruption event and each indicates:

- (1) The date of the Market Disruption;
- (2) The hour and Dispatch Interval when the Market Disruption ended;
- (3) The CAISO Market in which the Market Disruption occurred; and
- (4) A description of the nature of the Market Disruption, the nature of any actions taken by the CAISO, the rationale for such actions, and the Market Disruption prevented or minimized as a result of taking such actions.

For each of the CAISO Markets, Table 1 lists the number of Market Disruptions during the period covered by this report. As shown in Table 1, there were a total of 84 Market Disruptions for the reporting period.

Table 1: Summary of Market Disruption Report

Type of CAISO Market	Market Disruption or Reportable Events
Day-Ahead	
IFM	0
RUC	0
Real-Time	
Fifteen Minute Market Interval 1	4
Fifteen Minute Market Interval 2	3
Fifteen Minute Market Interval 3	7
Fifteen Minute Market Interval 4	3
Real-Time Dispatch	67

Table 1 above shows the market disruptions in the real time market in order to incorporate the FMM binding intervals.

The frequency of RTD failures increased from 61 to 67 in comparison to the report for the period of August 16, 2019 through September 15, 2019. RTD

failures accounted for approximately 80 percent of the Market Disruptions during this reporting period.

Planned Maintenance occurred on September 18th, September 23rd, September 26th, and on October 9th. On September 23rd there were 11 (9 RTD, 2 FMM) disruptions, on September 26th there were 3 (2 RTD, 1 FMM) disruptions, and on October 9th there were 8 (6 RTD, 2 FMM) disruptions due to IFM/RTN patching. On September 19th there were 8 (5 RTD, 3 FMM) disruptions due to database maintenance.

On September 20th there were 4 (RTD) disruptions due to two contingency dispatches for testing purposes. On September 26th there were 4 (RTD) disruptions due to two contingency dispatches for testing purposes. On September 30th there were 2 (RTD) disruptions due to a contingency dispatch for the loss of generation. On October 10th there were 2 (RTD) disruptions due to a contingency dispatch for the loss of transmission.

On September 16th the CAISO made a resource non-participating in FMM and RTD due to market failures. The resource was made non-participating strictly to resolve the FMM and RTD issue and not due to bidding concerns.

On September 22nd the CAISO made a resource non-participating in FMM and RTD due to market failures. The resource was made non-participating strictly to resolve the FMM and RTD issue and not due to bidding concerns.

On September 24th the CAISO made a resource non-participating in FMM and RTD due to market failures. The resource was made non-participating strictly to resolve the FMM and RTD issue and not due to bidding concerns.

On September 25th the CAISO made a resource non-participating in RTD due to market failures. The resource was made non-participating strictly to resolve the RTD issue and not due to bidding concerns.

On September 27th the CAISO made a resource non-participating in FMM and RTD due to market failures. The resource was made non-participating strictly to resolve the FMM and RTD issue and not due to bidding concerns.

On October 3rd the CAISO made a resource non-participating in FMM and RTD due to market failures. The resource was made non-participating strictly to resolve the FMM and RTD issue and not due to bidding concerns.

Market Disruption for Unique Pricing Feature

The CAISO implemented a feature to ensure unique pricing under a degenerate condition in November 2015, which was implemented along with other pricing enhancements to improve market efficiency. This feature was effective until August 14, 2018. On this day, the real-time five-minute market application failed to produce an optimal dispatch in a reasonable time and the unique pricing feature was disabled to obtain a valid solution. The problem associated with this feature propagated to the day-ahead market on August 21, 2018, and the fifteen-minute market on August 26, 2018.

Table 2 captured below shows the dates and market in which the pricing feature was disabled between September 16, 2019 until October 15, 2019. The uniqueness feature was enabled for all other intervals across all the markets for the timeframe captured in this report.

Notes:
Integrated Forward Market (IFM): The Day-Ahead Market run in which the CAISO conducts the market for purchases and sales of Energy for all hours of the next Trading Day based on submitted supply and demand bids, and performs the procurement of Ancillary Services.
Residual Unit Commitment (RUC): The Day-Ahead Market run in which the CAISO conducts unit commitment of additional resources based on submitted availability bids and the forecast of demand for every hour of the next Trading Day.
Fifteen Minute Market (FMM) Interval 1: The first of a series of four market runs conducted every Trading Hour in advance of the Operating Hour. In this run the CAISO conducts the Market Power Mitigation for submitted Bids, which applies to all of the Real-Time Market processes for the given Trading Hour. In this interval the CAISO also conducts the procurement of incremental Ancillary Services from internal resources and dynamic external resources.
Fifteen Minute Market (FMM) Interval 2: The second of a series of four market runs conducted every Trading Hour in advance of the Operating Hour during which the CAISO conducts the HASP. In the HASP, the CAISO conducts the procurement and sale of Energy and Ancillary services from non-dynamic System Resources based on submitted Bids and the CAISO Forecast of CAISO Demand. In this interval the CAISO also conducts the advisory procurement of incremental Ancillary Services from internal resources and dynamic external resources from T to T+60 minutes and procurement for the given Trading Hour.
Fifteen Minute Market (FMM) Interval 3: The third of a series of four market runs conducted every Trading Hour. During this interval the CAISO conducts the commitment of internal Short-Start and Fast Start Units for the Time Horizon of T-30 minutes to T+240 minutes. In this interval the CAISO also conducts the procurement of incremental Ancillary Services from internal resources and dynamic external resources for the given Trading Hour.

Fifteen Minute Market (FMM) Interval 4: The fourth of a series of four market runs conducted every Trading Hour. This interval is for the Fifteen Minute Market for the T-105 minutes to T+60 minutes time horizon. In this interval the CAISO also conducts 15-minute Ancillary Service Awards for non-Hourly System Resources, internal resources and dynamic external resources for the given Trading Hour.

Real-Time Dispatch (RTD): The five-minute interval of any given Operating Hour during which the CAISO conducts the market for Energy based on submitted bids and the CAISO Forecast of CAISO Demand.
