Case No. 17-00261-UT

Motion to Intervene of the California Independent System Operator Corporation

The California Independent System Operator Corporation (ISO) pursuant to NMAC 1.2.2.23, respectfully files this motion to intervene as a party to this proceeding opened by the New Mexico Public Regulation Commission to investigate the feasibility, including an analysis of costs and benefits, of Public Service Company of New Mexico (PNM) becoming a member of the Southwest Power Pool (SPP), the western Energy Imbalance Market (western EIM), or another organization such as the Mountain West Transmission Group (MWTG). In support of this motion, the ISO states:

1. This proceeding concerns an inquiry into whether PNM should become a member of the western EIM. The ISO serves as the market operator for the western EIM and, as such, has a direct and substantial interest in the proceeding. Because no other party can adequately represent the ISO's interests in the proceeding, the Commission should grant ISO's intervention. In addition, given its role as the market operator of the western EIM, participation by the ISO in this proceeding is substantially in the public interest.

2. Pursuant to NMAC 1.2.2.10, the ISO requests service of all pleadings, orders, notices, and documents filed by any party in this proceeding and requests that the Commission expand the service list to include the following authorized
