Re: Compliance Filing of the Large Generator Interconnection Agreement of the California Independent System Operator Corporation, Pacific Gas and Electric Company, San Diego Gas & Electric Company, and Southern California Edison Company –Docket Nos. ER04-445-015, ER04-443-012, ER04-441-011, ER04-435-019.

Dear Secretary Salas:

The California Independent System Operator Corporation (“CAISO”) respectfully submits an original and five copies of the instant filing in compliance with the order of the Federal Energy Regulatory Commission (“Commission” or “FERC”) dated November 1, 2006 in the above-captioned proceeding, *California Independent System Operator Corporation*, 117 FERC ¶ 61,148 (“November 1, 2006 Order”).

The Commission issued the November 1, 2006 Order in response to the June 23, 2006 request for rehearing by the CAISO on its Large Generator Interconnection Procedures (“LGIP”) and its Large Generator Interconnection Agreements (“LGIA”), including the joint revisions of the CAISO and the Participating Transmission Owners (“PTOs”)¹ to the LGIP and the LGIA.

In accordance with the direction in the November 1 Order that the CAISO remove all references to informational assessments from the LGIP and LGIA, the CAISO hereby submits a substitute version of the relevant tariff sheet that removes the reference to informational assessments from the definition of “Interconnection Feasibility Study” set forth in the LGIA. There are no other references to informational assessments in the LGIP or LGIA.

¹ PTOs include Pacific Gas and Electric Company, San Diego Gas & Electric Company, and Southern California Edison Company.

The Honorable Magalie Roman Salas
November 15, 2006
Page 2

The substitute tariff sheet with the changes to the definition of "Interconnection Feasibility Study" described above for the LGIA are provided in Attachment A to the present filing and are shown in blackline in Attachment B.

One additional copy of this filing is enclosed to be date-stamped and returned in the self-addressed, stamped envelope provided. If there are questions concerning this filing, please contact the undersigned.

Respectfully submitted,

Michael D. Dozier
Counsel

System Operator Corporation

ATTACHMENT A – CLEAN SHEETS FOR LGIA COMPLIANCE FILING

Interconnection Feasibility Study shall mean the preliminary evaluation conducted or caused to be performed by the ISO, in coordination with the applicable Participating TO(s), or a third party consultant for the Interconnection Customer of the system impact and cost of interconnecting the Generating Facility to the Participating TO's Transmission System.

Interconnection Handbook shall mean a handbook, developed by the Participating TO and posted on the Participating TO's web site or otherwise made available by the Participating TO, describing technical and operational requirements for wholesale generators and loads connected to the Participating TO's portion of the ISO Controlled Grid, as such handbook may be modified or superseded from time to time. Participating TO's standards contained in the Interconnection Handbook shall be deemed consistent with Good Utility Practice and Applicable Reliability Standards. In the event of a conflict between the terms of this LGIA and the terms of the Participating TO's Interconnection Handbook, the terms in this LGIA shall apply.

Interconnection Request shall mean a request, in the form of Part 1 to the Standard Large Generator Interconnection Procedures, in accordance with the ISO Tariff.

Interconnection Service shall mean the service provided by the Participating TO and ISO associated with interconnecting the Interconnection Customer's Generating Facility to the Participating TO's Transmission System and enabling the ISO Controlled Grid to receive electric energy and capacity from the Generating Facility at the Point of Interconnection, pursuant to the terms of this LGIA, the Participating TO's Transmission Owner Tariff, and the ISO Tariff.

Interconnection Study shall mean any of the following studies: the Interconnection Feasibility Study, the Interconnection System Impact Study, and the Interconnection Facilities Study conducted or caused to be performed by the ISO, in coordination with the applicable Participating TO(s), or a third party consultant for the Interconnection Customer pursuant to the Standard Large Generator Interconnection Procedures.

Interconnection System Impact Study shall mean the engineering study conducted or caused to be performed by the ISO, in coordination with the applicable Participating TO(s), or a third party consultant for the Interconnection Customer that evaluates the impact of the proposed interconnection on the safety and reliability of the Participating TO's Transmission System and, if applicable, an Affected System. The study shall identify and detail the system impacts that would result if the Generating Facility were interconnected without project modifications or system modifications, focusing on the Adverse System Impacts identified in the Interconnection Feasibility Study, or to study potential impacts, including but not limited to those identified in the Scoping Meeting as described in the Standard Large Generator Interconnection Procedures.

IRS shall mean the Internal Revenue Service.

ISO Controlled Grid shall mean the system of transmission lines and associated facilities of the parties to the Transmission Control Agreement that have been placed under the ISO's Operational Control.

ISO Tariff shall mean the ISO's tariff, as filed with FERC, and as amended or supplemented from time to time, or any successor tariff.

Large Generating Facility shall mean a Generating Facility having a Generating Facility Capacity of more than 20 MW.

Loss shall mean any and all damages, losses, and claims, including claims and actions relating to injury to or death of any person or damage to property, demand, suits, recoveries, costs and expenses, court costs, attorney fees, and all other obligations by or to third parties.

ATTACHMENT B – BLACKLINES FOR LGIA COMPLIANCE FILING

* * *

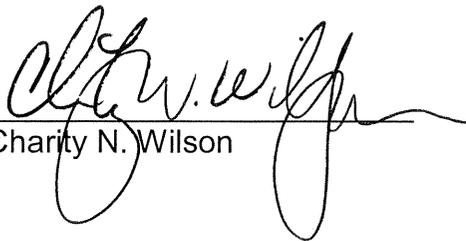

Interconnection Feasibility Study shall mean the preliminary evaluation conducted or caused to be performed by the ISO, in coordination with the applicable Participating TO(s), or a third party consultant for the Interconnection Customer of the system impact and cost of interconnecting the Generating Facility to the Participating TO's Transmission System, ~~and, if reasonably practicable, an informational assessment, as needed, of other affected owners' portions of the ISO Controlled Grid.~~

CERTIFICATE OF SERVICE

I hereby certify that I have served the foregoing document upon all parties on the official service list compiled by the Secretary in the above-captioned proceeding, in accordance with the requirements of Rule 2010 of the Commission's Rules of Practice and Procedure (18 C.F.R. § 385.2010).

Dated at Folsom, California this 15th day of November, 2006.

Charity N. Wilson
