

**COMMENTS OF NV ENERGY
2018 POLICY INITIATIVE CATALOG
DATED NOVEMBER 8TH, 2017
CAISO STAKEHOLDER PROCESS**

November 29, 2017

Lindsey Schlekeway, LSchlekeway@nvernergy.com

NV Energy appreciates the opportunity to comment on the 2018 policy initiative catalog and is supportive of the overall direction of the 2018 policy initiative catalog.

I. NV Energy's Position

a. Clarifications

The Over/Under Scheduling Load Enhancements item is identified in the catalog twice. This discretionary item is covered first as 6.1.4 and then stated again as item 6.1.23. NV Energy proposes the deletion of item 6.1.23 to consolidate these items.

b. Support and Proposed Priority

NV Energy supports the following stakeholder initiatives as its top priorities for 2018. The initiatives are prioritized in order of highest priority first.

1. Hourly EIM Resource Sufficiency Evaluation
2. Over/Under Scheduling Load Enhancements
3. Limiting EIM Energy Transmission Scheduled Resources Transfers
4. Market Commitment Process Constraints

Additionally, NV Energy continues to support the ongoing stakeholder initiatives and the Real Time Market Enhancement that has not yet begun.
