CAISO seeks written stakeholder comments on its GMC Charge Code 4537 – Market Usage Forward Energy Discussion Paper, which was posted on August 3, 2009 at <http://www.caiso.com/docs/2002/08/02/2002080216283419989.html>.

Stakeholders should use this Template to submit written comments and or suggestions. Written comments should be submitted no later than Close of Business on Monday, August 10, 2009 to: csnay@caiso.com. Comments will be posted on the CAISO website.

The subject areas upon which CAISO seeks stakeholder input are:

1. Which of the options listed in the whitepaper as a potential change to the structure of the Market Usage Forward Energy GMC Charge Code do you support?

Powerex supports Option 2 from the list of Recommended Options. In Powerex's opinion, Option 2 would most closely follow the cost causation principle and produce the most stable rate.

2. If none of the options presented in the whitepaper are supported, do you have an alternative proposal?

Powerex appreciates the CAISO addressing this issue and agrees that the current structure is not a viable solution going forward.
