

## *Transmission Development Forum*

*January 29, 2025*

# Reminders

- Stakeholder calls and meetings related to Transmission Planning are not recorded.
  - Given the expectation that documentation from these calls will be referred to in subsequent regulatory proceedings, we address written questions through written comments, and enable more informal dialogue at the call itself.
  - Minutes are not generated from these calls, however, written responses are provided to all submitted comments.
- To ask a question, press #2 on your telephone keypad. Please state your name and affiliation first.
- Calls are structured to stimulate an honest dialogue and engage different perspectives.
- Please keep comments friendly and respectful.

# Transmission Development Forum

## Stakeholder Call – Agenda

Topic	Presenter
Overview	Taha Marmoush - CAISO
Valley Electric Association / GridLiance West	VEA/GLW
Horizon West Transmission	HWT
Southern California Edison	SCE
San Diego Gas & Electric	SDG&E
LS Power	LS Power
Pacific Gas & Electric	PG&E
Wrap-up	Taha Marmoush

# Overview

- The CAISO is hosting, in collaboration with the CPUC, the Transmission Development Forum
- The purpose of the Transmission Development Forum is to create a single forum to track the status of transmission network upgrade projects that affect generators and all other transmission projects approved in the CAISO's transmission planning process
  - will not address individual interconnection concerns, but instead is intended to provide all stakeholders information on the status of new transmission projects and network upgrades
  - Will not include cost information

## The scope of the projects for the forum are:

- Previously approved projects through the CAISO transmission planning process
- Network upgrades identified in the generator interconnection process
  - Only projects that have progressed to having executed LGIA that have triggered initiation of projects have been included

# Project Information

- Workbooks of the approved transmission projects, network upgrades and the presentations are posted on the CAISO website under Transmission Development Forum
  - <https://www.caiso.com/library/transmission-development-forum>
- The workbooks with the project information will continue to be updated

# Coordination of ISO Transmission Development Forum with the CPUC Transmission Project Review Process

- The ISO previously held stakeholder calls and posted workbooks with updates to the schedule of the approved transmission projects and network upgrades quarterly. In 2025, the ISO will continue to hold the forum twice a year. The next forum will be held on July 30, 2025.
- Resolution E-5252 established the Transmission Project Review Process effective January 1, 2024
  - This applies to PG&E, SCE and SDG&E
  - The IOUs will provide detailed information on all projects twice a year, on a staggered schedule, with stakeholder process and multiple comment windows between each posting

<https://www.cpuc.ca.gov/industries-and-topics/electrical-energy/electric-costs/transmission-project-review-process>

# Additional Stakeholder Call

- The ISO, in coordination with the CPUC and PTOs, will be scheduling an additional stakeholder call in March or April as a part of the transmission development forum
  - PTOs will provide an update on activities they are have undertaken related to project management
  - CPUC will present on the SB1174 reporting in the 2024 California Renewables Portfolio Standard – Annual Report (November 2024)
- A market notice will be sent out when the meeting has been scheduled
