Reports and bulletins keep you current

Special reports and audits published by the ISO can help keep you up-to-date on our markets and operations.

Market reports

Reports and audits regarding system events and other operational issues including frequency response and contingency reserve charts, reports on load shedding and other events, and operational studies.

 **Daily renewables watch, monthly renewables report, greenhouse gas, wind and solar curtailment reports**
 The daily Renewables Watch provides important information about actual renewable production within the ISO grid. Renewables reports provide important information about actual renewable energy within the ISO grid as California moves towards a 33 percent renewable generation portfolio.

- ⊖ **Market performance reports** 
 - ⊕ **Ancillary services scarcity** 

This report presents details and financial impacts of scarcity events that occurred and fulfills the requirement in Tariff Section 27.1.2.3 that the ISO review the scarcity pricing mechanism every three years.
 - ⊕ **Congestion revenue rights reports** 

These reports provide Market Participants with information related to Congestion Revenue Rights (CRRs). Annual CRR reports are posted in this section, as well as any other reports that may relate to CRRs.
 - ⊕ **Daily market watch metric catalogs** 

These catalogs provide descriptions of all graphs published in the real-time and day-ahead daily market watch reports for each trading day.
 - ⊖ **Day-ahead daily market watch and summer reports** 

This report provides Market Participants with selected metrics on market performance to facilitate dissemination of market information in a timely manner. This data is preliminary and subject to change without notice. While every attempt is made to ensure these reports are complete and accurate, the data is not settlement quality.
