Reliability Requirements Customer Partnership Group

February 2021

Abdul Mohammed-Ali
Operations Engineering

Agenda

- RA credits
- CIRA enhancements
- RA enhancements for summer 2021
- Reminder: CSP process and timeline
- Reminder: Power contracts bulletin board
- Reminder: CPM contact information

RA Credits

- LSEs should not have credits on their RA plans (annual and monthly)
 - Except Under Construction credits on the “other” tab for annual showings
- Credits come from LRAs (through CIDI)
- LRAs will continue to send CAISO credits by T-45
- The credits will be uploaded in CIRA in two phases:
 - By T-45: CAISO credits (RMR and CPM)
 - After T-42 and before T-35: LRA credits (DR, CAM, and LD)
- More info can be found here:
<http://www.caiso.com/Documents/FAQ-Implementation-PRR1280ExecutiveAppealsCommitteeDecision.pdf>

CIRA Enhancements

- Planned deployment is early March
- LSE IDs will be sourced from Masterfile
 - SCs should plan to change the LSE ID in the RA and supply plans to match Masterfile LSE ID starting with the May RA submissions
- NQC and CPM designations will be posted to OASIS
- SCs will be able to see their acquired contract information in CIRA under “Reports” tab
- Under the substitution screen, the SC contact information for the substitute resource will be displayed (using the contact info on the supply plan)
- Training was held on 2/18/2021
 - Presentation and training recording can be found here:
<http://www.caiso.com/participate/Pages/LearningCenter/default.aspx>

RA enhancements for summer 2021 (pending policy and tariff approval)

- Planned deployment date is 6/1/2021
- **All** planned outages will need to provide RA substitution
 - Transmission induced generation outages and off peak opportunity outages will continue to be exempt
- The new validation will run once a day from T-44 until the end of the month
- SCs will have 24 hours to provide substitution in CIRA
 - For outages submitted before T-45, substitutions must be submitted after the T-44 validation run and before the T-43 validation run (i.e. 24 hours)
 - For outages submitted after T-45, the substitutions must be submitted after the first validation run after the outage is submitted and before the next validation run starts (i.e. 24 hours)
- If **full** substitution is not provided by the end of the 24 hour window the outage will be automatically denied (even if it was previously approved)

Reminder: CSP process and timeline

- Competitive Solicitation Process (CSP):
 - Three offer periods: annual, monthly, and intra-monthly
 - The monthly CSP offers may be submitted up to 40 days before the RA month
 - Intra-month offers may be offered up to 14 days prior to the RA month
 - More details under section 5 of the Reliability Requirements BPM
 - 2021 RA and CSP due dates:
<http://www.aiso.com/Documents/2021ResourceAdequacyandCompetitiveSolicitationProcessDueDates.pdf>

Reminder: Power Contracts Bulletin Board

- The bulletin board facilitates the buying and purchasing of power, as required by FERC Order 719.
- Market participants can view, post and modify requests to buy or sell power and resource adequacy contracts, including substitutions.
- Actual RA substitutions still need to be done in CIRA.
- Can be accessed using the following link:
<http://www.caiso.com/market/Pages/PowerContractsBulletinBoard/Default.aspx>

Reminder: CPM contact information

- A notification is sent to the SC when one of their resources gets a CPM designation in CIRA
- The notification is based on the SC's contact information in CIRA database
 - The SC has 24 hours to decline the CPM so keeping this information up to date is very important
- SCs are encouraged to make sure their contact information is up to date and update them as soon as an organizational change happens
- SCs are encouraged to use a group email or distribution list for this type of notifications
- Updates to the contact information can be made by submitting a CIDI ticket

Questions

For follow-up questions or to suggest future topics please contact your client representative or submit a CIDI ticket.
