Title: EDAM Transfer System Resource (TSR) e-tagging – MISC info

Date: Thursday June 4, 2026

Project Associated: Extended Day-Ahead Market (EDAM)

Background:

As part of EDAM activation efforts, the ISO would like to share recommended best practices for tagging EDAM Transfer System Resources (TSRs).

Recommendations:

Under EDAM, TSRs are to be registered in MasterFile as resources and are given unique resource ID, or a Transient TSR ID can also be created in SIBR (similar to a Transaction ID). As a market practice to link market schedules to tags, the ISO recommends including the unique TSR identifier (i.e. CAISO_RES_ID) associated with the awarded transfer in the MISC field in addition to the Transmission Allocation field for the associated transmission segment on the e-tag (see below example provided as a reference).

Reference:

The unique TSR unique identifier should adhere to the following nomenclature:

(Scheduling Coordinator ID)_(From BAA)_(To BAA)_(InterTie)_(Import (I) or Export (E))_(TSR Type)_(Alpha-Numeric Identifier)

This unique identifier is what the ISO recommends including the value for the “CAISO_RES_ID” token in the “Misc Info” field of the CISO transmission segment.

For illustrative purposes, provided below on the next page is an example for a TSR Type 2 from “ENTITY” (i.e. and EDAM Entity) to CAISO at “INTERTIE” (ISO registered ITIE), with a Source at “ENTITY.GEN” and a Sink at “NP15”.

For any questions/comments, if you are a Scheduling Coordinator (SC) please submit a CIDI inquiry ticket. If you are a Generator Owner, please submit questions through your SC, or use the [Contact Us](#) page on www.caiso.com. For application access issues, please contact the ISO Service Desk at (916) 351-2309 or (888) 889-0450
