

California ISO Readiness Notes

Title: Maintenance Updates to Resource Interconnection Management System (RIMS) October 2026

Contact: Please submit a [CIDI inquiry ticket](#)

Primary Audience: RIMS users, specifically those who participate in the New Resource Implementation (NRI) process.

Please review the maintenance information below for updates to **Transmission projects** and the **MPAI dashboard**. These updates include new Transmission project fields and additional MPAI dashboard filtering options.

Transmission Project Updates

Users with Transmission project types should note the following changes:

- Three new fields are being added:
 - Connection Voltage (kV) Level
 - Station Name
 - EMS Station Name
- PTOs are required to provide the Connection Voltage (kV) Level and Station Name as part of the bulk load submission for new and existing projects.
- These fields are not editable in the UI and will populate once the bulk load is submitted.
- CAISO will populate the EMS Station Name.

Connection Voltage (kV) Level	EMS Station Name	Station Name

MPAI Dashboard Updates

The MPAI dashboard now includes two additional filtering options:

- Assigned Point of Delivery
- Nameplate (MW)

Project Id	Type	PTO	Assigned POD	Project Name	Status	Nameplate (MW)

For any questions/comments, if you are a Scheduling Coordinator (SC) please submit a CIDI inquiry ticket. If you are a Generator Owner, please submit questions through your SC, or use the Contact Us page on www.caiso.com. For application access issues, please contact the ISO Service Desk at (916) 351-2309 or (888) 889-0450
