

## California ISO Readiness Notes

**Title:** New Missing Meter Data Screen in MRI-S

**Expected Production Date:** February 5, 2026

**Contact:** CustomerReadiness@caiso.com or submit a CIDI ticket

**Targeted Audience:** Market Participants, specifically Scheduling Coordinators who submit, view, or download meter data in the MRI-S application.

**Details:**

CAISO is introducing a new enhancement in the Market Results Interface – Settlements (MRI-S) to support Market Participants in identifying and resolving missing Meter Data prior to the tariff-defined submission deadline. This improvement is designed to help Scheduling Coordinators (SCs) self-correct data issues in a timely manner and avoid potential penalties.

A new **Missing Meter Data** screen has been added under the **Meter Data** tab in MRI-S. This feature allows users to view resources with missing meter data for a selected Trade Date. The information displayed will be accessible and query-able by each resource's associated SC.

Users will be able to view missing metering data by:

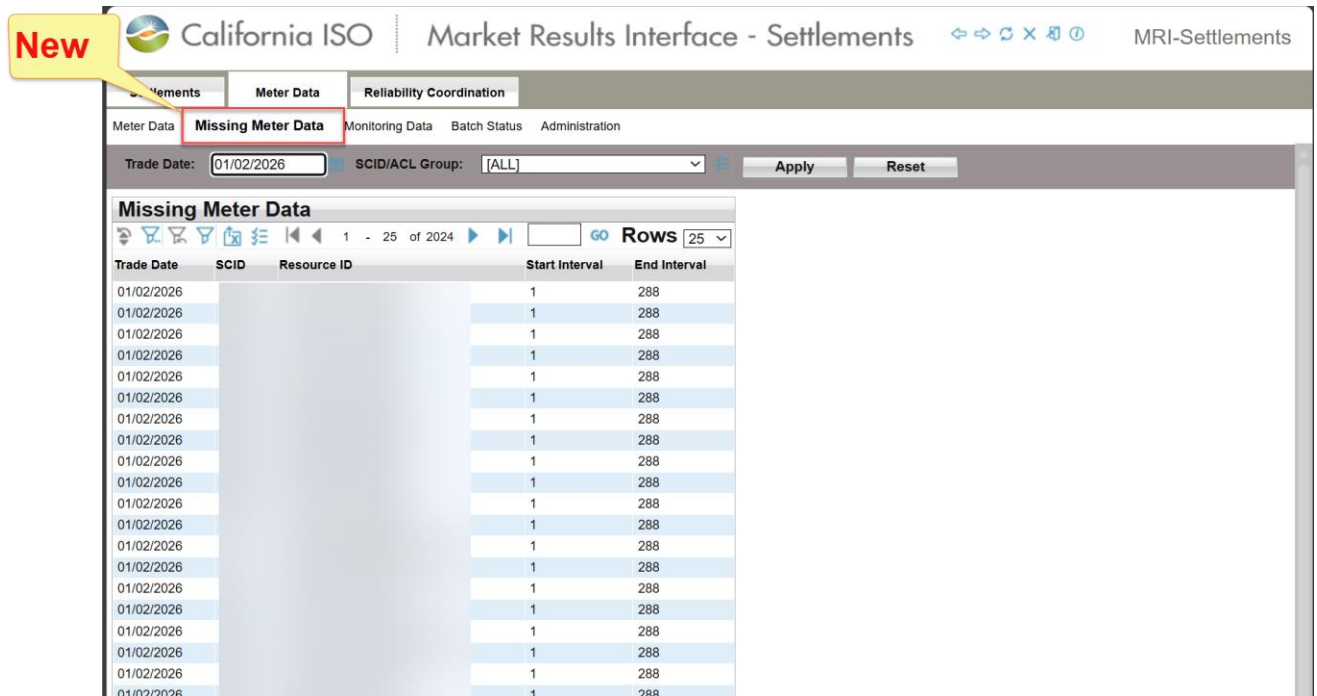

- Trade Date
- SC ID
- Resource ID

**Important:**

This new screen will replace the courtesy notices previously sent by the EDAS team on T+44B, providing Scheduling Coordinators with a more direct and timely way to monitor and address missing data. The EDAS team will discontinue these manual T+44B emails on **February 9, 2026**.

### How It Works:

1. Navigate to the **Meter Data** tab in MRI-S.
2. Select the **Missing Meter Data** screen. Make sure you are provisioned for the Meter data role for MRI-S. If not, please coordinate with your organization's UAA.
3. Enter the desired **Trade Date**.
4. Choose the **SCID/ACL Group** associated with your organization.
5. Click **Apply** to display a list of resources missing meter data for that **Trade Date**.
