

California ISO Release Notes

Title: New Column in BSAP to Display JOU Aggregate Base MWs for All JOU Children

Expected Release Date: Monday, August 22, 2022

Link to associated training documents (if applicable): N/A

Contact: CustomerReadiness@caiso.com or submit a CIDI ticket

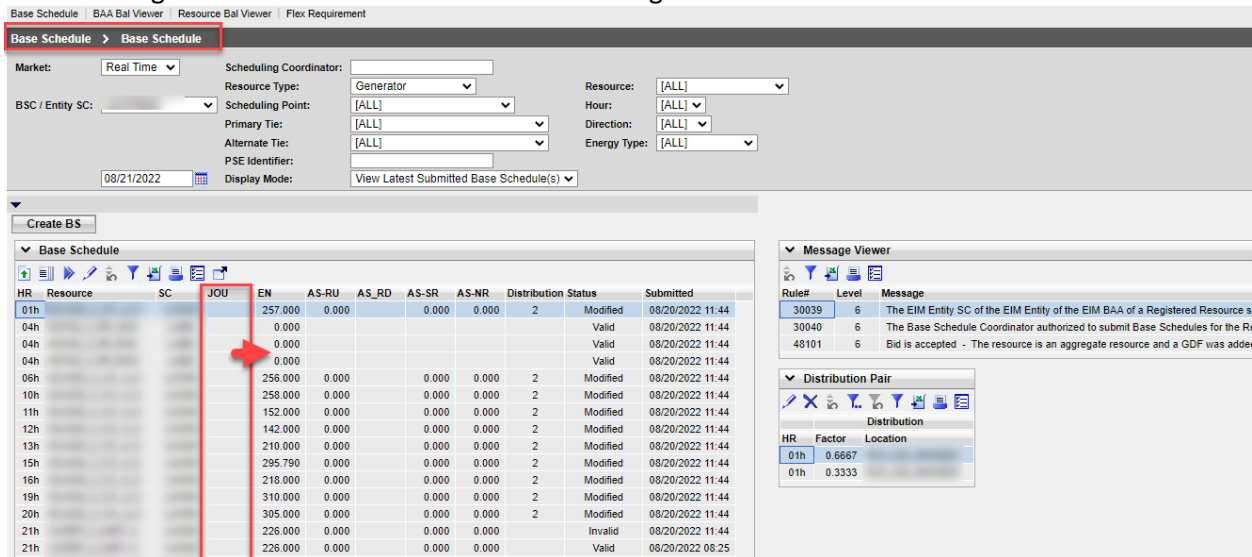

TCR(s) or Project Associated: Spring 2022 SIBR Updates

Details: The following changes will be effective as of Monday, August 22, 2022, by 14:00 Pacific Time

In the Base Schedule Aggregation Portal (BSAP), on the Base Schedule tab, a column has been added Titled JOU. This add on allows for a Joint Owned Utility (JOU) to show the aggregate energy megawatt (EN MW) base from all resource for all JOU children under a JOU parent.

This change is being implemented on the BSAP User Interface (UI) only. The JOU column will only populate if there is a base schedule submitted for the JOU child.

The following BSAP screenshot shows where this change will be viewed.

The screenshot displays the BSAP Base Schedule tab. The 'Base Schedule' section is active, showing a table with columns: HR, Resource, SC, JOU, EN, AS-RU, AS-RD, AS-SR, AS-NR, Distribution Status, and Submitted. The JOU column is highlighted with a red box, and a red arrow points to the first data row. The table shows various resources and their associated EN values. The JOU column is currently empty for all rows.
