Southern California Edison (SCE) offers the following comments on the 2018 Stakeholder Catalog of the California Independent System Operator (CAISO)¹.

The CRR auction mechanism redesign should be the highest priority item and should be immediately addressed in an expedited stakeholder process for implementation as soon as possible.

The RDT Attribute Reporting Responsibility (RARR) should be prioritized as the next highest in the ranking process and also immediately begun as a stakeholder process. This stakeholder topic is necessary in order to implement the CAISOs directives to utilize the physical characteristics of the resource under contingency circumstances while utilizing economic attributes during non-contingency circumstances. As such, this element must be addressed soon to carry out an effective market design.
