## Reliability Services Initiative - Phase 2

### Second Revised Draft Final Proposal

Submitted by	Company	Date Submitted
<i>Martin Blagaich</i> 626-302-3302	SCE	2016-10-03

1. Forced outage substitute capacity for RA resources capacity in local capacity areas. *Please state if you support (please list any conditions), oppose, or have no comment on the proposal.*

SCE does not object to the policy developed within this initiative. It seems reasonable to separate system and local RA showings.

2. Process to update Effective Flexible Capacity (EFC) list during the year. *Please state if you support (please list any conditions), oppose, or have no comment on the proposal.*

SCE supports the proposal to allow scheduling coordinators to update the EFC list by request throughout the year.

3. RA showing tracking and notification. *Please state if you support (please list any conditions), oppose, or have no comment on the proposal.*

SCE has no comments on this proposal.

4. RA showing requirements for small LSEs. *Please state if you support (please list any conditions), oppose, or have no comment on the proposal.*

SCE appreciates the clarifications made by the CAISO on the potential MW magnitude and backstop costs resulting from RA showing exemptions to small LSEs. SCE encourages CAISO to continue to update stakeholders on the magnitude of the exempted RA showings, but otherwise has no other significant concerns with this proposal.
