SCE appreciates participating in the CAISO's 2014-2015 Transmission Planning Stakeholder meeting. SCE has reviewed the Draft Study Plan and appreciates the opportunity to provide the below clarifying comment on the CAISO's February 27, 2014 stakeholder meeting.

SCE requests CAISO to confirm that its Local Capacity Studies for the reliability needs under the CPUC 2014 LTPP phase will only be run with the 33% 2024 RPS with Low - Mid AAEE load representations, as noted in the CAISO 2014-2015 TPP Study Plan and its 2014-2015 Transmission Planning Stakeholder Meeting Presentations on February 27, 2014.

Thank you.
