SDG&E's comment is focused on Section 43.2.2.1 of the Tariff. ISO submitted revised Tariff to FERC (ER15-1783) which includes revised language for this section. FERC approved ISO's Tariff amendment to take affect March 1, 2016. SDG&E believes this section in the marked tariff language is not necessary since the approved Tariff language will supersede ISO's revision in a relatively short time.
