

September 10, 2018 Exceptional Dispatch CPM Designation Report

Designation Summary:

The California ISO issued an Exceptional Dispatch Capacity Procurement Mechanism (CPM) designation to HUMBPP_6_UNITS for a non-system reliability need. The designation is effective September 10, 2018 for a duration of 60 days.

Duration and Cost:

RESOURCE_ID	MW	ED Code	Estimated CPM Cost
HUMBPP_6_UNITS	25.73	Local Reliability Issue	\$324,712.6

The estimated capacity cost is based on the accepted offer price of \$6.31/kw-month.

Reason for CPM:

The ISO issued an Exceptional Dispatch CPM designation to HUMBPP_6_UNITS to address an Exceptional Dispatch Non-System Reliability Need. The Exceptional Dispatch was issued to address a potential thermal overload on a 60 kV line in the PG&E Area for the next contingency event. The designation amount reflects the minimum amount of capacity the ISO could designate to mitigate the reliability need posed by the potential thermal overload.
