CAISO seeks written stakeholder comments on its GMC Charge Code 4537 – Market Usage Forward Energy Discussion Paper, which was posted on August 3, 2009 at <http://www.caiso.com/docs/2002/08/02/2002080216283419989.html>.

Stakeholders should use this Template to submit written comments and or suggestions. Written comments should be submitted no later than Close of Business on Monday, August 10, 2009 to: csnay@caiso.com. Comments will be posted on the CAISO website.

The subject areas upon which CAISO seeks stakeholder input are:

1. Which of the options listed in the whitepaper as a potential change to the structure of the Market Usage Forward Energy GMC Charge Code do you support?

WPTF appreciates the CAISO’s willingness to remedy the adverse and improper application of the market forward usage charge to ISTs. WPTF finds both the CAISO’s recommended options to effectively provide this remedy. In order to assess the relative merits of Option 1 versus Option 2, WPTF and its members need to get a better understanding of the expected MU-FE rate under each case and a better understanding of the CAISO’s logic for how the options meet cost-causation principles. WPTF therefore requests that the CAISO provide estimate of the MU-FE rate under each option to stakeholders as well as the rationale for how each recommended option meets cost causation, and provide a brief comment period thereafter so that stakeholders may comment more fully on the two preferred options.

2. If none of the options presented in the whitepaper are supported, do you have an alternative proposal?
